

QUALITY AND ENVIRONMENTAL POLICY

I.M.S. S.p.A. is aware that the Quality and Environmental Management System's continuous improvement is essential to achieve the highest level of Customer satisfaction and to ensure the environmental protection and that's why it commits to provide, through a deep and precise commercial and technical expectation analysis and through the activity risk analysis, the following services:

- Supply of materials, with respect for the environment, and/or services according to Customer needs relating to a wide range of products, quality of the materials, piping sizes and lengths, specific marking systems, inspection, packing, storage, shipping and certification procedures.
- Supply of products fully in compliance with the most recent international production standards (ASTM, ASME, EN, API, EAC) and Customers and End-Users project's requirements.

I.M.S. S.p.A. General Management is committed to the Corporate goals achievement and ensures that the Quality and Environmental Policy is applied throughout the Organization directly involving the function managers and all the staff, taking in charge of:

- Maintaining the Quality and Environmental Management System according to the international standard UNI EN ISO 9001:2015 and UNI EN ISO 14001:2015.
- Pursuing the continuous improvement of the Quality and Environmental Management System to increase quality and environmental performances.
- Understanding and sharing within the Company the Customer needs and expectations relevant to the Quality Management System.
- Setting the Corporate Quality, Health and Safety and Environmental objectives, monitoring and verifying their achievement during the overall Management Review.
- Defining and managing the main activities processes, their integrations and continual improvements.
- Identifying risks and opportunities arising from the above mentioned processes in order to fulfil the applicable requirements.
- Reviewing and evaluating the Environmental, Social and Governance (ESG) corporate goals in connection with corporate business activities and all interested stakeholders.

- 🌱 Promoting an effective decision-making process based on a real and detailed data analysis.
- 🌱 Guaranteeing environmental preservation, pollution prevention in compliance with mandatory requirements.
- 🌱 Promoting energy saving policies.
- 🌱 Promoting the use of goods and services with low environmental impact.
- 🌱 Using rationally and efficiently all natural and energy resources, monitoring consumptions and taking appropriate corrective actions where possible, such as but not limited to: maintenance interventions, technological modernization and/or installation of own energy production plants from renewable sources.
- 🌱 Raising staff awareness of a continuous commitment to waste reduction and correct and responsible waste management, according to mandatory regulations.
- 🌱 Discouraging the use of disposable products.
- 🌱 Encouraging eco-sustainable means of transport, also allowing flexibility in working hours.

The **Quality and Environmental Manager** in charge **ensures proper management, maintenance and preservation of the Quality and Environmental Management System** by issuing and regularly updating its procedures to set out Company strategies and routine practices.

All I.M.S. S.p.A. employees are responsible to comply with the content of the aforementioned documents.
